

To: Christian Osiadacz

From: Wendy Spoto

Subject: October meeting outcomes

Date: October 15th, 2020

Dear Christian,

Please find the agreements achieved during your visit to our headquarters in Bend.

1. As part of our Global Marketing Plan we migrate the Microbeshield Technology Product name to Xmicrobe™, please proceed to align with the new corporate brand name as soon as possible.
2. Please contact Mrs. Jamee Kingsbury to obtain the new logos designs and chart of colors.
3. We confirm that Xmicrobe and Bio-Protect are the same product and chemistry. Xmicrobe is sub-registered under Bio-Protect EPA registration 87583. The EPA registration ties to that of our master label under the name of Bio-Protect, a strategic partner for 8+ years. Xmicrobe is formulated and bottled at our facility in Oregon, EPA establishment number: 90638.
4. As a result of several tests taken place in different laboratories belonging to the GVN (Global Virus Network) organization around the globe against the SARS 2 virus and our field experience, we strongly recommend to reduce the protection lasting on High Touch Surfaces to 120 days or less.

Best regards

Wendy Spoto
